

## **Proposed Description of Web Datasets**

The D.C. Sentencing Commission has prepared four public datasets containing data for felony offenses sentenced in the District of Columbia Superior Court from January 1, 2010, through December 31, 2015. Each dataset includes demographic information such as gender, race, and age; as well as sentencing information such as the offense, offense severity group, and the type and length of sentence imposed. The four datasets represent four sets of data as listed below.

1. All Offenses – Dataset includes all felony offenses sentenced from 2010 through 2015.
2. Property Offenses – Dataset includes felony property offenses sentenced from 2010 through 2015.
3. Drug Offenses – Dataset includes felony drug offenses sentenced from 2010 through 2015.
4. Homicide Offenses – Dataset includes homicide offenses sentenced from 2010 through 2015.

In addition to the datasets, the Commission has also provided a brief definition for each data element within the datasets. These definitions are included as part of the downloadable datasets. Individuals interested in more extensive data sets may send a completed data request form ([click here](#)) via email to [sccrc@dc.gov](mailto:sccrc@dc.gov)
